ABOUT ME

I'm a product-minded iOS Technical Manager with extensive experience (+ 15 years) leading teams and building reliable, scalable mobile products in fast-moving fintech environments. My work centers on creating clear technical direction, strengthening engineering fundamentals, and driving execution from early discovery to post-product-market-fit scale. Working in teams that value ownership, transparency, and a strong connection between product decisions and technical strategy consistently brings out my best work

EXPERIENCE

iOS Technical Manager / iOS Architect Engineer

Globant

Rosario, Argentina (Remote Collaboration)

2011–Present

- Led iOS engineering initiatives for the Santander UK mobile application, guiding architectural decisions, code quality standards, and long-term platform maintainability across a large-scale financial product.
- Drove technical direction in a high-compliance fintech environment, collaborating with security, backend, QA, and product teams to deliver secure and performant mobile banking experiences.
- Improved engineering workflows by standardizing Clean Architecture, modularization with Tuist/SPM, enabling faster iteration cycles and more predictable delivery.
- Mentored iOS engineers, provided technical reviews, and helped establish an engineering culture focused on clarity, reliability, and high-impact execution in alignment with product goals.

iOS Technical Manager / iOS Architect Engineer

Rootstrap

Rosario, Argentina (Remote Collaboration)

2021–2023

- Led and mentored iOS engineering initiatives for the Fuzzy mobile application, guiding architectural decisions, code quality standards, and long-term platform maintainability across a large-scale financial product.

SKILLS

Technical Skills: Swift, SwiftUI, Objective-C, UIKit, Clean Architecture, MVVM+C, POP, SOLID, Tuist, Swift Package Manager, CoreData, Git

Leadership & Strategy: Agile Leadership, Technical Strategy, Code Review, Team Mentorship, Cross-functional Collaboration

PROJECTS

Santander UK – Mobile Banking App

2023–Present

Contributed to the development and continuous improvement of the Santander UK iOS banking application, focusing on architecture, code quality, and secure feature delivery in a high-compliance fintech environment.

Santander Openbank – Mobile Banking App

2016–2023

Implemented and maintained major features for the fully digital Openbank iOS app, working on architecture modernization, performance improvements, and feature delivery for millions of users.

EDUCATION
